

Docket No. JHM 962

What I claim as my invention is:

RECEIVED
U.S. PATENT AND TRADEMARK OFFICE
JULY 2013

Claim 1. The combination of an accessory for an exercising device and an exercising device comprising:

an exercising device, and

said accessory is a means for mounting a computer device on said exercising device,

said means for mounting a computer device comprising a platform,

brackets attached to said exercising device,

said brackets also being attached to said platform, and

means for adjusting said brackets relative to the exercising device in two different directions.

Claim 2. The combination as claimed in claim 1, wherein said platform has a bottom,

said brackets being attached to said bottom of said platform by bracket holders.

Claim 3. The combination as claimed in claim 1, wherein said computer device is a means for accessing the internet.

Claim 4. The combination as claimed in claim 2, wherein there are four

Docket No. JHM 962

spaced bracket holders fixed to said platform.

Claim 5. The combination as claimed in claim 4, wherein each of said brackets have a horizontally disposed section and a vertically disposed section, said bracket holders being mounted to said horizontally disposed section of said bracket, and
each of said bracket holders being fixed to said bottom of said platform.

Claim 6. The combination as claimed in claim 5, wherein said vertically disposed section of each bracket has a sleeve movable along said vertically disposed section, and

a clamp mounted by a pivotal connection to said movable sleeve,
said exercising device having a frame member on which said clamp is mounted, and
said means for adjusting said brackets relative to said exercising device in two different directions is said sleeve and said clamp.

Claim 7. The combination as claimed in claim 6, wherein there are four bracket holders,
each of said bracket holders being spaced from other bracket holders,
each bracket holder receiving a horizontally disposed section of said bracket,

and

means on each bracket holder for engaging said horizontally disposed section of the bracket.

Claim 8. The combination as claimed in claim 7, wherein said means on each bracket holder for engaging said horizontally disposed section of the bracket is screw threaded.

Claim 9. A device for use with exercise equipment comprising:
a support near said exercise equipment,
supporting means for a personal computer,
whereby a user can simultaneously operate a personal computer while exercising.

Claim 10. The device as claimed in claim 9, wherein said support is attached to said exercise equipment by means of supporting rods and brackets, and wherein thumbscrews are used with said supporting rods and brackets to adjust the position of said rods with respect to said brackets.

Claim 11. The device as claimed in claim 9, wherein said support is manufactured with said exercise equipment.

Claim 12. The device as claimed in claim 1, wherein said exercising device is a treadmill

Claim 13. The combination of an accessory for an exercising device and an exercising device comprising:

an exercising device, and
said accessory is a means for mounting a game device on said exercising device,
said means for mounting a game device comprising a platform,
brackets attached to said exercising device,
said brackets also being attached to said platform, and
means for adjusting said brackets relative to the exercising device in two different directions.

Claim 14. The combination as claimed in claim 13, wherein said platform has a bottom,
said brackets being attached to said bottom of said platform by bracket holders.

Claim 15. The combination as claimed in claim 14, wherein there are four

Docket No. JHM 962

spaced bracket holders fixed to said platform.

Claim 16. The combination as claimed in claim 14, wherein each of said brackets have a horizontally disposed section and a vertically disposed section,

 said bracket holders being mounted to said horizontally disposed section of said bracket, and

 each of said bracket holders being fixed to said bottom of said platform.

Claim 17. The combination as claimed in claim 16, wherein said vertically disposed section of each bracket has a sleeve movable along said vertically disposed section, and

 a clamp mounted by a pivotal connection to said movable sleeve,
 said exercising device having a frame member on which said clamp is
mounted, and

 said means for adjusting said brackets relative to said exercising device in two
different directions is said sleeve and said clamp.

Claim 18. The combination as claimed in claim 16, wherein there are four
bracket holders,

 each of said bracket holders being spaced from other bracket holders,

Docket No. JHM 962

each bracket holder receiving a horizontally disposed section of said bracket,
and
means on each bracket holder for engaging said horizontally disposed section
of the bracket.

Claim 19. The combination as claimed in claim 18, wherein said means on
each bracket holder for engaging said horizontally disposed section of the bracket is
screw threaded.
